M. D. Golden Centre

The 5th. meeting of Council of the M. D. of Golden Centre No. 272, was held at N.E. 13-30-5-4, on Saturday, July 13, 1929. Members all present except Councillor Stewart.

Council called to order by Reeve and business transacted as follows:

Minutes read and confirmed. Correspondence read and disposed of.

Assessment of Wild Lands Tax levied against the North east half of 5-30-5-4, was sustained.

Road diversions were authorized to be surveyed at E½ 15 30 1-4, S.W. 20 30 1-4, S.W. 35 30 1-4, and N.W. 2-31-4-1.

Financial statement to June 29, 1929 was read and accepted. The accounts were passed and paid.

Dept. of Public Works was requested to locate bridge between sections 20, and 21-30-5. Councillor Jorgenson was instructed to inspect section 24-30-5, and remove loose wire and fill well and cellar, if necessary. Council adjourned to meet on Saturday, August 3, at N.E. 13-30-5, at 9 a.m.

Ralph Green, Sec.-Treas.

All Roads Lead to Oyen for Fair and Stampede Friday, July 26

Dr. J. A. Leadbeater of Calgary, his sons Lloyd and Roy, and his brother, were visitors at the home of Mr. S. L. Kline last Sunday, while en route to Saskatoon. Dr. Leadbeater and his brother proceeded on their journey latter in the day the boys staying with Mr. Kline to spend a holiday.

Fuego Oil Well News

The Fuego oil well was shut down for a couple of days last week waiting for a new drilling cable to come from Calgary.

The cable arrived on Friday and unloading commenced at 2 o'clock and by 7 o'clock the cable weighing 6540 lbs had been transported by Mr. W. D. Morrell to the well on his truck a distance of nearly 14 miles unloaded and spooled into the derrick, the drilling tools attached and ready to again hunt for oil.

The company expects that by next week the side-tracking of the old casing will be completed and the drill will be exploring new territory.

All Saint's Anglican Church, 9th. Sunday After Trinity Oyen, Alta., July 28 Sunday School 1.45 p.m. Evensong and Sermon 3 p.m. Rev. Leonard C. Scott.

The U.F.A. and U.F.W.A. convention, held in Oyen last Thursday proved by far the best yet held by these organizations. The number of delegates and visitors present and the general interest displayed constituted a record.

The general business of the morning session which included the election of committees, passed off smoothly.

The afternoon session was addressed by Lorne Proudfoot, M.L.A., who gave an interesting and lucid talk on legislation passed during the last session, some phases of provincial finance, power development in the province, and changes to the School Act. This was followed by a period for questions, resolutions and the elections of officers, and concluded by an address by Robert Gardiner, M.P., on "Amendments to the Grain Act."

Premier Brownlee, the speaker of the evening, was given a rousing reception. In a pleasingly delivered address he dealt with the many problems which have confronted his government and are still being dealt with, not least among which are the proposed changes in the School Act and the Public Health Act. He was given an attentive hearing and received very hearty applause at the conclusion of his remarks.

Robert Gardiner, M.P., then gave an address outlining the session's work at Ottawa, financial problems of the Dominion, highlights on the budget and the important amendments to the Election Act.

All sessions were presided over by Mr. James Cameron, the retiring president.

During the recess between the afternoon and evening session, supper was served to the delegates and visitors at the United Church by the Ladies Aid.

Mr. Everett Hodges of Lethbridge arrived in Oyen last Sunday to visit his parents and sister. Mr. Hodges is an enthusiastic ball player and played on the Oyen team yesterday at Alask.

New Departure In Finance

Large New York Bank Loan Small Borrowers From Loan Sharks

When a bank finances a corporation with millions of dollars, that is not news. But when the same bank throws its resources behind John Smith's unpaid doctor bill, that is a new departure in finance. The National City Bank is doing just that, taking care of rich bills for worried people who are not even depositors. Considering their financial predicament, it is a way that is saving thousands from the loan sharks.

In a year, 30,000 persons have received loans from the bank, and 97 per cent. of them have made good on their payments. The loans average, only \$250 each and were nearly all made to small wage-earners.

Statistics compiled from the first year's experience indicate that the average borrower is thirty-four years of age, has been in the same position steadily for more than five years, earns \$2,700 a year, is married, and has one child. He has got behind on his rent, his insurance, his doctor bill, payments or improvements on his house, or some such personal emergency. He needs a little money badly for a short time, and is glad of a chance to borrow at 6 per cent. from a bank, rather than from friends and relatives, and to pay it back with small weekly or monthly payments extended over a year.

One of the first applicants for a loan was a man who had a year before, been compelled to borrow \$1,000 to meet expenses in connection with the long illness and death of a daughter. He secured this loan from a small loan association of business associates at a prohibitive rate of interest—100 per cent. Able to pay only \$20 a week, at the end of a year he had paid a full \$1,000 but still owed the principal, and was in despair. Borrowing \$1,000 from the bank, he was able in 1928 to get free from this debt.

Loans are not made for luxuries. Thirty per cent. of the loans made to date have been for such necessities as hospital services, 15 per cent. to pay debts, and 11 per cent. to meet payments on homes.

One feature of this loan service that is comforting is that each borrower is insured, without cost to himself, for the full amount of the loan, so that in case of his death, neither the co-makers of his note nor his family has to finish the payments due.

Had Curious Experience

English Motorists Recently Saw Strange Mirage On London-Southampton Road

One of the strangest phenomena ever seen on English roads was witnessed by thousands of motorists. For miles after mile extraordinary mirages danced before the eyes of drivers. "Have you seen the mirage?" was the question wherever motorists met. Driving along the main road from Southampton to London between noon and 4 p.m., writes a correspondent, was a curious experience. In the hot sunshine what appeared to be lakes of water lay every few hundred yards, only to fade away as the car approached. Traffic took all sorts of fantastic shapes. Some cars looked as though they were travelling in the air.

"Three months ago I caught a fish that weighed 40 pounds. I don't remember just when it was exactly now."

"July."

"No, sir, I was telling the exact truth."

"Men who travel a great deal seldom marry," says an Englishman. In other words a rolling stone gathers no moss.

Thirty-seven miles of carpet were laid on the floors of a modern hotel recently erected.

"You are quite drunk."

"I know I am, but it will soon pass off. But you are a fool, and that will not pass off."

—Hummel, Hamburg.

W. N. U. 1795

Rural Nursing

Need For More Hospital Beds, Doctors and Nurses in Isolated Areas

No one orthodox plan of rural health nursing can be laid down and universally accepted as the ideal type of health organizations for all non-urban Canada, because of the wide difference in conditions found in so vast a land. Miss Elizabeth Stettin, chief superintendent, Victorian Order of Nurses for Canada, stated in an address on the present situation from the viewpoint of the public health nurse, at the International Nurses' Congress in Montreal. The full co-operation and combined wisdom of provincial governments, directors of training schools for nurses and the leaders in public life were needed to secure the best distribution of available physicians and nurses, she stated.

Miss Stettin's paper on rural nursing in Canada brought out the need for more hospital beds and more doctors and nurses for isolated areas. This means larger government appropriations for health purposes. To provide adequate salaries, she said, "to ensure professional attention for people requiring it but possibly unable to pay for it, or beyond the reach of it."

Other suggestions for the improvement of conditions in rural communities put forward by the speaker were representation by a public health nursing group on the Dominion Council of Health, the continued use of the health unit plan, more full-time officers of health and better living arrangements for rural nurses.

Leaves Son One Dollar

Chinese Father Bequeathed Neglected During His Old Age

Chinese ethics on filial obligations—the duty of a son to his father—according to Oriental ideas were cited by Chin Sam Duck, formerly of No. 9 Pell Street, New York, when he was called for probate in Superior's Court, Chin died Jan. 8, 1929, in a New York hospital.

"I know," says the decedent, "that Chin Jung Do will provide for me, but as he has all the pride of his honorable ancestors."

Referring to his other son, Chin Jung Do, of No. 9 Pell Street, New York, the father makes a bequest of \$1,500, which is the residue of the estate, intrusting to him to care for his wife, Ng Shien, and three other sons, Chin Jung Gu, Chin Jung Ming, and Chin Jung Gwak, all of Lin Par Gon, Kwangtung Province, China.

"I know," says the decedent, "that Chin Jung Do will provide for me, but as he has all the pride of his honorable ancestors."

Totem Pole For Rideau Hall

Presented To Lord Willington By Indians At Friendly Cove

Before proceeding to Friendly Cove, N.B., to remove the totem pole which the North Indians presented last year to His Excellency the Governor-General, T. B. Campbell, Canadian head of the Rideau Hall, Canada, as "Totem Pole" Campbell, because of his work of restoring totem poles for future generations of Canadians and visitors to Canada, spent a weekend at Jasper Park Lodge. The Indians at Friendly Cove, he stated in an interview, through their chief, Captain Jack, had presented Lord Willington with a magnificent totem pole for Rideau Hall, and it was now the engineer's task to uproot it and prepare it carefully for its long trip across the Dominion. Friendly Cove was where the famous Captain Cook landed during his voyage along the Pacific Coast.

Canadian Police Forces

The police forces in Canadian cities are of high calibre. There have been comparatively few cases of unfaithfulness to trust recorded in their annals. They are men of integrity. They bring to their duties a high sense of responsibility to the public they serve and protect, and it may be added, the character and achievements of any force depend largely on the chief constable.—Calgary Daily Herald.

Aerial Photography In 1928

During the 1928 season, 88,600 aerial photographs of areas in different parts of Canada were taken by the Royal Canadian Air Force, for the Topographical Survey, Department of the Interior. Of these, 17,560 were oblique views and the remainder vertical views.

"This is a heck of a drug-store," we heard a man remark when told by an obliging clerk that they didn't stock lawn-mowers.

New Director

W. J. Blake Wilson, of Vancouver, Vice-President and Director of P. Burns & Co., Ltd., Calgary, who has been appointed a director of the Canada Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway. Mr. Wilson is also a director of the Canadian Pacific and even a dozen other outstanding progressive Canadian organizations.

Dr. Mayo Praises Canadian Brains

Pays Tribute To High Mentalities Found In Dominion

Canadian affairs may feel the influence of a billion dollars of American capital, but American affairs feel the influence of \$10,000,000 worth of Canadian brains. Dr. William Mayo, of the Mayo clinic in Rochester, Minn., said in an interview at Montreal.

The doctor, accompanied by Mrs. Mayo, sailed aboard the "Dixie" for Montreal, for Manchester, England, to attend a convention of the British Medical Society.

"I can speak for the place Canadian brains have in the American medical profession," the doctor continued. "At Rochester, 10 per cent. of the American Surgeons Association is Canadian. In all matters except politics, and particularly in science, the two countries are one."

"The boundary line is real as a political demarcation, and this is as it should be."

Law and Order In N.W.T.

The maintenance of law and order in the vast, remote regions known as the Northwest Territories of Canada is one of the important branches of the work of the Royal Canadian Mounted Police. The administration of this great area is carried on by the Northwest Territories and Yukon Branch of the Department of the Interior.

Building Active At Calgary

With land sales to the middle of June valued at \$47,000, and with the value of building permits for the same period equal to \$4,426,007, officials were convinced that at the end of the half year period Calgary will have passed the most successful half in its history.

Band's Famous Springs

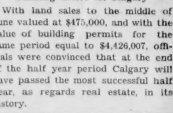

The waters of the Sulphur Hot Springs at Banff, in Banff National Park, Alberta, are of great medicinal value and are very similar in composition to the waters at Bath, England.

Invents Egg Saw

Burned fingers and stained clothing will be a thing of the past when every breakfast table is equipped with the saw for boiled eggs recently invented by a chef of Paris. So believes the inventor. The device is round. Just fit it over the dome of the hen fruit, squeeze the levers, and the circular saw snips off the dome neatly and quickly.

It's Full of Menace

No. 12, Tete Jaune—105 yards, Par. 3.

Many an otherwise fine score has been wrecked by this hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played. The reason is obvious by a study of the green in the upper photo and of the lay-out as shown in detail by the lower one. Fine fields of golfers are assured for the two big events over this fine course this summer, and the day-tallent of the Western Canada Championship with the Dominion title event, insures plenty of competitive golf for experts and dubs alike.

A Neglected Duty

People Should See That Horses Receive Plenty of Water

There is largely being superseded in the streets by the motor wagon and the car, but he still gives service to mankind in large numbers, especially in the smaller cities and towns. But there is one duty to him which is badly neglected and should be attended to wherever practicable.

That is the provision of drinking accommodation in hot weather. There is a general and deplorable lack of drinking facilities for horses in almost every small city, and this humane provision should be seen to. Humane societies have many calls on their funds in the direction of prevention of cruelty work. A body of public-spirited citizens ought to be found in every community prepared to act if the local authority does not accept drinking fountains for horses as one of its civic obligations.

Falling that, drivers should occasionally get a pail of water when they stop for deliveries and offer the horse a drink.

That is one of the least, but one of the most necessary, services that men can do for a four-footed servant.

Occupation That Is Dangerous

Sailing On Great Lakes Frequently Battle Heavy Storms

Sitting by the river and lazily watching the Great Lakes freighters sailing placidly by, the average person does not always think of the hardness and bravery of the men who man the ships. It seems an attractive life to the one who is not a sailor.

But life is not altogether sweet for the sailors of these lakes. There is an existence of danger and trial storms at sea are usually associated with these liners. Yet, tempests bring grave danger in their wake frequently whip the waters of the Great Lakes into seething cauldrons.

What that happens, the crews of the great freighters have their work cut out for them. Their life instantly becomes a battle for very existence—existence, not only for themselves, but for all their comrades on their own ship, and often for those on other craft who have been endangered by damage to their boat.

The Chinchilla Rabbit

Standard Of Registration Is Set By Canadian Snail Breeds

Of the many breeds of rabbits that are bred for their fur, the chinchilla is perhaps the most valuable. According to Bulletin No. 28, of the Department of Agriculture, at Ottawa, on "Rabbits," the chinchilla originated in France about fifteen years ago. It is now being bred and spread to Great Britain, the United States, Canada, and many other countries.

The standard of registration set up for the chinchilla by the Canadian Snail Breeds Association, gives the colour as resembling the wild chinchilla, with an under-color of slate blue at the base, intermediate portion pearly, merging into dark grey and black, then white, and finally blending with black. The weight is 6 to 7 pounds for does, and 5½ to 6½ for bucks. Other qualifications are described in the pamphlet, which treats of housing, feeding, breeding, and marketing the carcasses and skins.

Serves No Good Purpose

Nothing In Particular To Be Gained By Trans-Atlantic Flight

No one has yet been able to explain what good purpose these trans-Atlantic flights are serving, excepting new in the idea. The trip has been made by a number of planes and lighter-than-air machines. Every successful flight reports a gruelling experience with the chances all against success, all the way. No government regulation, of course, can stop such flights. If aviators would-be aviators want to keep on taking chances, there is probably nothing that officialdom can do about it.—Border City Star.

No Argument

The Labor hater at a Russian Labor meeting was very persistent.

"You say you are a Liberal because your great-grandfather, grandfather and father were Liberals," he asked the candidate. "Then, if your great-grandfather, your grandfather and your father were fools, what would you be?"

"Laborer" murmured the candidate sweetly.

And silence reigned.

Japan's Big Problem

Japan, with a larger population than the British Isles, has a much smaller area of land which can be cultivated. Consequently, she is having difficulty in feeding her people. She imports ten to twenty million bushels of rice yearly.

Mrs. MacTavish: Sandy, there's company at the door.

Mr. MacTavish: Quick! Grab a toothpick!

The name Dixie is derived from the Mason and Dixon line.

Two Principal Methods Of Canning

One-Period Cold Pack and the Fractional or Intermittent Method

The one-period cold-pack method is so called because the uncooked or partly cooked food is packed into a jar and covered with some liquid, such as syrup or water, and both the jar and its contents are heated simultaneously by boiling water or steam. This method may be used for all fruits and vegetables, and is recommended for home use. It is a very simple process and completely sterilizes the product as the product is placed in the sterilized jars which are closed during the cooking process. The organisms are killed and access by any bacteria from the air and other outside sources is rendered impossible. The appearance of the finished product is superior to each berry or slice remains intact. There is no crushing. The flavor, color and texture are more natural.

Another method, described in Bulletin No. 77 "Preserving Fruits and Vegetables in the Home," involves the carrying on of the sterilization period for three successive days. This is used in the case of vegetables which are not strictly fresh, and is especially applicable and desirable for those vegetables lacking acid, such as peas, corn, and beans. It is more thorough as regards sterilization than the one-day process owing to the fact that spores, which may develop after the first sterilization, are bound to succumb during the second and third days of sterilization, but the intermittent sterilization involves considerable more handling than necessary in the one-day method, also more fuel is consumed.

Huge Seaplane Is a Marvel

German Company Has Kept Con. Attention A Close Secret

The largest heavier-than-air machine ever built—a mighty 10-motor seaplane—was put on exhibition at Friedrichshafen, preparatory to test flights which may herald an aviation new step in the progress of man. It is built to carry 112 persons.

The seaplane was built recently at the Dornier works on the shores of Lake Constance, and rumors of the great size and power only recently reached the public.

The plane itself is approximately 150 feet long with a wing span still greater—about 160 feet.

The builder of the craft claims it will develop a maximum speed of about 155 miles per hour and a normal cruising speed of 115 miles per hour.

The plane has quarters for 100 passengers and a crew of 12 men. In addition there is fuel capacity for a flight of about 625 miles with a 50 per cent. reserve fuel load, making the maximum cruising range about 1,000 miles.

The lower deck of the big plane has space for fuel, baggage and sleeping quarters for the crew. The middle deck is for the well-fitted passenger cabins and a luxurious dining room.

The engine and radio rooms and the pilot's quarters are on the upper or third deck of the seaplane. The main and auxiliary will be controlled indirectly from the pilot's room.

The plane has been under construction for many months. The Dornier Company having kept its work secret in order to make the craft as nearly perfect as possible.

Plas For Trees

Value Of Trees Cannot Be Reckoned In Dollars and Cents

The value of a tree was recently made known by an eminent entomologist, who reports that 50 fair-sized oaks were recently sold at \$5,000 apiece and that many are worth \$10,000 each. A tree not only has a cash value, but also possesses a value that cannot be reckoned in dollars and cents. It is a very tremendous asset to a tree, and it is equally simple to foster its growth.

If every property owner made it a point to plant a tree on available space and refrained from the ruthless destruction of those already well grown, much would be done towards eliminating the folios of "promiscuous and thoughtless destruction."—Kitchener Daily Record.

Indians Are Exempt From Motor Laws

Vancouver Indian Boards Of Trade Discover Unusual Situation

There are no provisions in the regulations to exempt the Indian from the automobile when he is driving an automobile. It was learned through the efforts of the Indian Board of Trade, the agenda of the Associated Boards of Trade of Vancouver Island, in convention there.

The Indian is not legally responsible for any danger he might do while driving, so the Mainland Board of Trade suggested the attorney-general be asked to introduce legislation making it compulsory for Indians to take out third-party insurance policies.

Just Another Cat

She was taking her terrier for a run in the park and met her dearest enemy who was wearing a deerskin new fur coat.

The little dog jumped up to greet the wearer, who cried, "Down! Down!" in an angry voice.

"Forgive my pet, darling," said his owner. "I can't teach him not to chase cats."

Guest (to waiter)—I've lost a half dollar somewhere on the floor. If you find it, you may give it to me, otherwise you may keep it yourself.

Japan's Big Problem

Japan, with a larger population than the British Isles, has a much smaller area of land which can be cultivated. Consequently, she is having difficulty in feeding her people. She imports ten to twenty million bushels of rice yearly.

Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future practicalities in Sir Henry Thornton of the Canadian National Railways, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay uncompleted, eroding, its roadbed sunk so deep in places that the rails jutted forth like steel tentacles. Men have fought blizzards, howling, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry see planned to the northward when that golden spike is driven?

"I believe there may be a time when great hordes will rear themselves at Fort Churchill, the terminus, to accommodate the tourists who have sailed up the east coast along the fringe of Labrador and through Hudson Strait; then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at last to disembark and proceed home with every comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway. "A railroad," says Sir Henry, "is never finished." It has to grow with the development it starts. Who dare predict the scope of the development that will gather wings to put to flight the little sweep that already has proved the northward to be a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will not be denied their railroad accommodation. The terminus of next month will become the junction of many lines. "A railroad is never finished."

The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; smelters are rising, water-power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a railroader as Sir Henry Thornton says is never finished.—Manitoba Free Press.

Fish Meal Industry

C. Produced 14,000 Tons of This Commodity Last Year

Last year British Columbia produced 14,000 tons of fish meal, of which 1,000 tons were used in British Columbia for poultry feed. Seven thousand tons were exported to Germany, for dairy cattle feed chiefly other exports were to California for poultry feed. The first exports of fish meal from the province being used as fertilizer.

The total annual receipts of building societies in Great Britain are more than \$500,000,000.

There are 85 known varieties of goldens.

"I suppose you will soon be married, Miss Gile?"

"Not yet. Marie's pig is not fat enough yet."—Lustige Sachse, Leipzig.

V. N. L. 2750

Cost Of Rearing Draft Horses

Record Kept Of Cost Of Raising Thirteen Percheron Colts

One of the big problems that the farmers of many provinces will have to face for at least some years to come, is where the necessary draft horses may be purchased. Will they be good horses and the kind desired? How much will they cost?

With the object of throwing light on this question, cost studies have been made at the Ste. Anne de la Poudre Experimental Station since 1921. From that year to 1928, thirteen Percheron colts were raised to the age of two and one-half years. The weights of the colts, food consumed, and cost for each colt, was tabulated.

To grow these colts to working age, an average of 4,921 pounds of hay, 3,694 pounds of oats, 960 pounds of bran, and 7.7 months of pasture was required, at an average cost of \$116.37 per colt, weighing 1,517 pounds.

No mention is made of the service fee as this varies with the station used and district, nor has any charge been made of the mares having nursed these colts. At this station, as at many farms where colts are raised, the mares, as a rule, are, before giving birth to the colts, and after weaning, worked more than necessary to pay for their upkeep during the year. From the figures given above on the feed consumed by the thirteen colts reared in this five-year period, it will be seen that the average cost is 40 per cent below the cost of draft horses of similar qualifications and weight in the open market. These experiments and many others appear in the annual reports of the experimental station, and stations, which may be had on application to the Publication Branch of the Department of Agriculture, at Ottawa.

Seven Cents For Cheese

Was Considered Good Price Half a Century Ago

A cheese factory account book of 1879, just half a century ago, is in the possession of Walter Stinson of Cherry Valley, Ont. It shows that the highest price received for cheese that year was seven cents. For the month of July, patrons received 30 cents per one hundred pounds of milk, just enough to buy the present-day cheese a gallon of gas to run his car.

To Discuss Young Plan

The conference to discuss the Young plan for settlement of the reparations problem, it is understood, will open August 6. No decision has yet been made as to the place of meeting.

Criticizes History Books

Says Canada's Part In The Great War Passed Over Lightly In Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 words devoted to the part Canada played in the Great War," stated Dr. J. L. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Patriotic Sons of Canada, in the course of an address before the eighth annual convention of that organization at Winnipeg.

"Such a condition of affairs in the education of our children is a national shame and national disgrace," he declared. The text books were published in the United States and edited in the United States by Americans, said Dr. McDougall. Educational authorities, when asked for an explanation, replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle Show and Sale, good average prices were paid for bulls, thirty-eight head of Shorthorn bulls averaging \$170, fifteen head of Shorthorn females averaging \$114, four Aberdeen Angus bulls averaged \$175, three Hereford bulls averaged \$188, and an aged Holstein bull sold for \$110. Quite a number of bulls, including both the champion Aberdeen Angus and the champion Hereford were bought by Saskatchewan Live Stock Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed.

Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat said Dr. Gerslaw, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Camrose, Regina and Moose Jaw with Medicine Hat.

Canada's Mica Output

Practically all of the mica produced in Canada is of the amber variety (phlogopite). Mines in the Ottawa region, both in Ontario and Quebec, are the principal producers.

Chiba's most ancient city, Baracoa, is to be improved and embellished after hundreds of years of neglect.

National Research Council Will Endeavor To Solve Many Economic Problems

Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Varieties Of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture. It was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand. "Our experiments this year confirm that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discovered by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

Has Faith In Alberta's Gas Fields

Engineer From Buffalo Predicts Province On Eve Of Great Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He stated that he is convinced that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

Origin Of The Word "Humbung"

Few people who use the word "humbung" so glibly, realize that it is a corruption of the name of a well-known German port. Some years ago, when wars were common on the continent, so many "false reports" came from Hamburg that people used to say sceptically, "That is Hamburg!" So "Hamburg" became corrupted into "humbung."

Lavas rarely flow as much as a mile an hour.

Waste gas from Alberta's oil fields, loss from fermentation and other problems of the Canadian honey industry said "the iodine content, and control of iodine salts in Canada," will be investigated by the National Research Council. Decisions will be reported on the work in addition to the 100 or more other problems now under investigation. All parties actively engaged in seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October. Dr. Chas. Cunniff, deputy minister and other representatives from the Dominion Department of Mines; Dr. G. S. Whitney, director of chemistry at McGill University; representatives of the University of Alberta, who have given considerable study to the situation and Dr. H. M. Terry, chairman of the National Council, will be included in the personnel.

The council has already been included in co-operation with the Dominion Department of Agriculture at the request of the industry and will be further advised by an associate committee appointed at the meeting.

Iodine in salt was brought to the attention of the council by the Canadian Chemical Association, and the Canadian Medical Association, the declaration of the former being that "it is not yet certain that the iodine in salt is entirely beneficial to public health. Some aggregating \$25,000 were granted at the meeting to aid research projects in Canadian universities. The largest sum went to the University of Saskatchewan, who for six years, has conducted an exhaustive study of the effects of alkali water on commerce and cuisine. A grant was made to Professor E. F. Burton, of the University of Toronto, for the purpose of developing his new method of determining moisture content of wheat, wood and other products. A grant of \$2,500 was made to the University of British Columbia, who might continue his work on the economical utilization of the waste heat of the ion, generation of electricity, using the windmill as prime mover, internal parasites of sheep, ovine and poultry, design of steel columns and struts for buildings and bridges, blood pressure reactions and the spectra of helium were included in the researches aided.

British Columbia Bulls

Sent To England To Be Planted In Old Country Parks

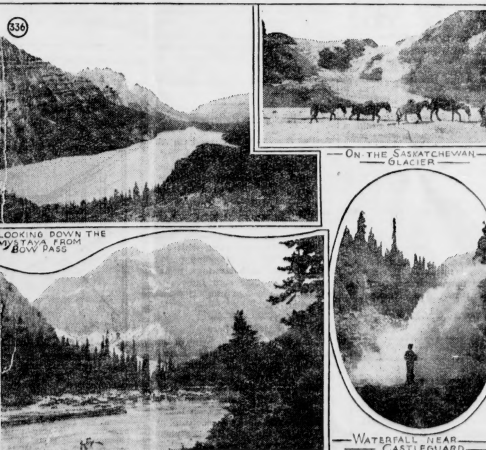

British Columbia bulls, believed to be equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Tomin, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulls might be exported to Britain to be planted, and labelled, in the public parks.

Growing The Old Water Power

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 10.7 per cent, and that the total development now amounts to 5504 installed turbine horsepower per 1,000 of population.

Close to 35,000 persons are employed in road construction in Canada each year.

Riding on the Roof of the Rockies

SHADOW LAKE UNDER THE SHADOW OF MT. BALL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and lasting six days, to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise, up the Bow Valley to Bow Lake, over Bow Pass

and by the Mistaya Valley past Waterton Lakes to the North Saskatchewan River, then up the Alexander River Valley to Chateau and the Columbia Icefield. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders

or those who cannot spare the time, there will be a four-day ride starting from Banff August 1, and ending at Castle Mountain Bungalow Camp. It is estimated that the ride will be the most successful of the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful shadow Lake under Mount Ball will be the camp site of the riders on the second day out and, in all, seven glacial lakes will be on the route of the trail.

"What has happened?"

"The cat scratched me."

"But what about all those wounds on your head?"

"Oh, that! Well, all she threw the soup tureen at me."—Esquella, Barcelona.

Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

"While much is said in regard to the rapid development of Canadian industries, very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis and under full control of the growers themselves," says an article in the "Vancouver Sun" of June 18, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

WORLD HAPPENINGS
BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending maple questions have been concluded and an agreement has been signed.

The first loan issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Peping's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in listless fashion, and incoherently and aimlessly.

Two United States fishing vessels seized by the Canadian Government Fisheries Protection steamer "Malapinta," at Goose Harbor, 100 miles south of Prince Rupert, recently, were released by Mr. Justice Martin in the Admiralty Division Court.

The much debated revised prayer book of the Church of England will likely be discussed in the British House of Commons again following its endorsement by the bishops assembled in the convocations of Canterbury and York recently.

Dr. Frank L. McKinnon, well known in the medical profession, died at Winnipeg recently after a brief illness. During the war he served for four years in Montserrat and was decorated with the Military Cross.

World automobile production increased by more than 1,000,000 vehicles in 1928, as compared with 1927, and set a new record total output for the industry, according to a report of the U.S. Department of Commerce. In 1928, Canada produced 242,382 cars, as compared with 170,054 in 1927.

Aaron Shapiro, famous cooperative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent. membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic dispatch recently. Mr. Shapiro's voice broke down during a recent tour of the West.

Growth Of Co-Operation

Catching The Vision Of Things That Might and Can Be Done

"Co-operation is a growth and a way of living. Each day a larger and larger number of men and women awaken to the full significance of the truth that no man can live unto himself. There are still those who in this young country, where progress is second nature, who have not been awakened. They have not yet caught the vision of things as they might and can be. They simply do not understand, and they must not become impatient even with these backward members of society."—A. J. McPhail, President of Saskatchewan Wheat Pool.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

A Severe Attack of
Dysentery
Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only three years old, had a very severe attack of dysentery, and after three days treatment with other things we decided to try Dr. Fowler's Wild Strawberry on this day his bowels had moved twenty-three times in eleven hours. After four doses checked it to a short time, so we offered it to him again. His bowels were troubled, and it too was relieved within thirty hours.

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1795

Japan Favors Canadian Wheat

Wheat From Dominion Has Supplanted U.S. Product in Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tsuchiro Shoda, president of the Nishinichi Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centres of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 200,000 tons of Canadian wheat annually. It is all shipped through Vancouver. Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity on 20,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

Cross Crossings Cautiously

National System Starts Drive To Combat Level Crossing Accidents. As a further effort in the campaign to reduce crossing accidents, the Canadian National Railways, through the Director of Safety, W. A. Booth, have distributed two thousand copies of a special card from the lithographed face of which, is an appeal to motorists, and others, to "Cross Crossings Cautiously." These posters are being sent out from the headquarters of the three regions in the Dominion will be marked. The instructions are to place these posters on poles close to the railway crossings and on the right hand side of approach.

In the letter of instructions it is stated "The time is now opportune when aggressive methods must be taken to combat the increasing number of highway accidents."

Abolish Corporal Punishment

Juvenile Offenders in Britain May Escape Birch Rod

Youthful law-breakers in England will no longer have to fear the birch rod if a movement to abolish corporal punishment for young offenders is successful.

W. Clarke Hall, London, police court judge, explained his opposition to the widespread practice of "birching" at a conference of 70 judges and presented a report showing that 50 per cent. of the boys who had been whipped in a certain court came back again charged with similar offences.

Prosperity Reflected

Marked Growth Is Evidenced On All Sides In City of Regina

In a booklet issued by the Regina Board of Trade, dealing with statistics of the city as revised on June 30, marked growth is seen on all sides in the capital of the province. Building permits for the first five months of the year reached a total of \$4,399,772 as compared with \$1,300,855 for the corresponding period of 1928, while bank clearings, postal revenue and other such indices of prosperity all reflect prosperity and expansion.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$150,000 for the seed cleaning plant and warehouse at Moose Jaw.

The Columbia Ice Field

The melting waters from the Columbia Ice Field in Jasper National Park, Alberta, feed the sources of three historic rivers in the Canadian west, the Athabasca, the Columbia, and the Columbia, which flow to three separate oceans.

More than half the arable land in Japan is in rice.

Most of the bacon eaten in Britain is imported from Denmark.

SUNDAY SCHOOL LESSON

JULY 29

THE STORY OF DANIEL

Golden Text:—"They that are wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever."—Daniel 12:3.

Lesson: Daniel 1:1-21; 2:13-19; 4:1-7:28; 8:10-13; 9:20-25; 10:1-19; 12:3.

Devotional Reading: Psalm 46.

Explanations and Comments

The First Captives Taken To Babylon, 1:1. In the third year of Jehoiakim's reign, 605 B.C., that Nebuchadnezzar, King of Babylon, first besieged Jerusalem and carried back with him to the land of Shinar (the old name of Babylon; Gen. 10:30), Jewish captives, together with some of the treasures of the temple which he then had placed in the treasure-house of his god Mar-duk. Among the captives were Daniel and three other youths of his lesson. Daniel belonged to a family of high rank in Jerusalem, and, according to Jerome, was at this time only a boy.

The Training Of Daniel And His Companions In Babylon, verses 3-7. Nebuchadnezzar directed Ashpenaz, the eunuch, to select for his court the Jewish youths of noble birth who were especially fair and bright and wise, and were therefore potential candidates for official positions, and teach them the language and customs of the Chaldeans. The king also directed that the youths were to be furnished with a portion of the food and wine which were prepared for himself. After it was thought, had reference to Babylonian dieting, that the youths selected were Daniel and three companions, Hananiah, Mishael, and Azariah, Daniel's name meant "God Is Judge," Hananiah's, "Jehovah is gracious," Mishael's, "Who is what God Hears," and Azariah's, "Jehovah has helped." Ashpenaz called them and then instructed Shadrach, Meshach, and Abed-nego, giving them names which were really not very serious in character. It is undoubtedly true that once a boy or man has the stigma of conviction against him he is socially handicapped in the race of life. Mercy is not being asked for those who are in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

For First Offenders

Attorney-General Of Ontario In Favor Of More Frequently Suspending Sentences

The Attorney-General of Ontario, Hon. W. H. Price, would entail the sympathy of judges and others in favor of more frequently suspending sentence on first offenders. After a speech and various suggestions, the opinion that lives are frequently wrecked by court sentences for offences against the laws that are really not very serious in character. It is undoubtedly true that once a boy or man has the stigma of conviction against him he is socially handicapped in the race of life. Mercy is not being asked for those who are in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council rendered judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 38 of the Canadian Fisheries Act of 1914 were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament has set up a system of licensing of fish canners as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

Towns Form Boards Of Trade

"There is no better evidence of faith in a district than the example of its business men forming a board of Trade to advance its welfare," says the Edmonton "Chamber of Commerce News." "During the last month, boards have been organized at the following towns: Thorold, (It. Baker, Secretary); Kinross, (C. H. Field, Secretary); and Slave Lake (A. Pearl, Secretary)."

Record Of Fire Losses

Fire losses in Canada during the year ended July 10, 1928, are estimated by "The Money Times" at \$239,500, as compared with \$139,200 for the year ended July 10, 1927, and \$264,750 for the corresponding week of last year. From January 1, 1928, fire losses totaled \$1,135,850, and from January 1, 1929, to July 10, 1929, they were \$1,279,620.

More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

WINDOLITE The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that the glass we are actually excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the scientific and healthful requirements. It has conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to make a healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry raising, and has made possible the capacity and fertility of chicks, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light strong windows for cattle sheds, stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of shears any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 125 to 130 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, Laid, Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Read for booklet "WINDOLITE."

About Town and Country

Born—To Mr. and Mrs. Howard Cates of Oyen, at Cereol, on Friday, July 10, a daughter.

Born—To Mr. and Mrs. P. H. Henderson, of Oyen, on Tuesday, July 16, a daughter.

Born—To Mr. and Mrs. Frank Logan of Cappon, at Oyen Hospital, on Saturday, July 20, a son.

Mr. and Mrs. Thos. Lees and daughter Christina returned to Oyen yesterday after spending a holiday at the mountain resorts.

Service at the United Church next Sunday will be conducted by Mr. Welch at 7.30 p.m.

Mrs. William Affleck is visiting friends in the New Bridgen district.

Mr. and Mrs. G. A. Gosselin and daughter, who have been spending a holiday at Waterloo Lakes, returned to Oyen last Monday.

Dr. S. R. McGregor is spending the fore part of this week in Red Deer.

Mr. and Mrs. S. A. Neid and Mrs. J. C. Ihde left last Monday en route to Calgary and Banff.

Mr. and Mrs. Robert Nisbet who motored to Calgary last Wednesday, returned to Oyen Monday evening, when they were accompanied by Mrs. J. B. Watson of Calgary, Mr. Nisbet's sister.

Mrs. E. H. Church left last Thursday en route to Ottawa, to visit her brother, who is seriously ill.

Mr. and Mrs. Robert McLaren and daughter Joyce, who have been spending a vacation at Buffalo Lake, returned to Oyen last Sunday evening.

Mrs. F. C. McLean left yesterday on a trip to Calgary.

Mr. and Mrs. Robert Marsden who have been spending a week's holiday in Edmonton, attending the fair and visiting friends and relatives, returned to Oyen yesterday.

In recording the visit of Mrs. D. E. Parsons and daughter Margaret, of Spokane, Wash., at the home of Mr. and Mrs. R. Cates, it was incorrectly stated in our last issue, that Mrs. Parsons was the sister of Mrs. Cates. Mrs. Parsons is Mr. Cates' sister.

Notice of Impoundment and Sale

Notice is hereby given under Section 10 of The Domestic Animals Act (Municipalities) that one 1077, straw berry roan, clipped foretop, no visible brands was impounded in the pound kept by T. M. Abbott, located on the N.E. 27-4-4, on Tuesday the second day of July A.D. 1929, and that the said animal was sold on the sixteenth day of July 1929, to J. J. Holloway of Oyen, Alberta and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchase of said animal.

For information apply to the undersigned.
J. P. Boraback, Sec. Treas., of the Municipality of Cereol No. 242, Oyen, Alberta.

Spring Valley Garden Party and Picnic

Spring Valley Church celebrated its annual garden party and picnic on July 16, under pleasant holiday weather conditions. The function proved to be one of the most delightful outings held under the auspices of the church, and was well attended by residents from all parts of the district.

The success of the event was in no small measure due to the various committees in charge who worked faithfully to put Spring Valley on the map as 'a district to come to for a pleasant outing. A well arranged program of sports kept the crowd interested and in happy mood until supper, which was served cafeteria style and thoroughly enjoyed by the guests present.

A program of songs, recitations and community singing followed after supper and concluded the doings of a very happy day. The favorable comment passed by those who attended must be gratifying to those who worked so hard to make the day a success.
